

**Engineering Modular Services  
Project Planning**

**OPUS Consultants**

Pioneering Sustainability Solutions and  
Redefining the Boundaries of Innovation

## Precision Success Through Impactful Outcomes

Project Planning is essential for ensuring the successful execution of a project. Our services encompass a range of activities aimed at organizing, coordinating and managing all aspects of a project from inception to completion.

Our main objective is to promote common understanding among project management partitioners in applying project planning, monitoring and control concepts. We provide guidelines in establishing Work Programme apart from evaluating and forecasting project progress. Capturing historical project data that can be utilized in planning for balance of works in the same project or other new projects, as well as enrich knowledge among project management practitioners.

**OPUS** partners with you to identify the most cost-effective comprehensive project planning and scheduling strategies that not only meet clients' project requirements but also drive exceptional results. Our commitment to enhance project outcome is rooted in innovative and sustainable practices that optimise resource allocation, streamline timelines and proactively manage risks. By leveraging cutting-edge methodologies and tools, OPUS empowers your projects to achieve peak efficiency and success, ensuring that every milestone is met whole exceeding stakeholder expectations as long as within budget. Together, we transform visions into reality, setting new standards for excellence in project delivery.

**With our dedicated team of experienced engineers, coupled with our cutting-edge hardware and state-of-the-art planning software, We are committed to deliver our services to meet our Clients' objectives.**

## Navigating Success with Precision

### Building Information Modelling (BIM) at Level of Detail 400 (LOD 400)

By leveraging BIM Level of Detail 400 (LOD 400) in planning and scheduling during construction, OPUS able to transform construction processes through enhanced precision and efficiency. Whereby the level of detail allow us for:

- **Streamlined Coordination:** better collaboration among stakeholders, minimizing conflicts and improving communication throughout the project lifecycle
- **Optimised Scheduling:** Enables more accurate sequencing of construction activities, allowing for effective resource allocation and timely project delivery.
- **Cost Efficiency:** Accurate cost estimation and budgeting, enable clients manage their expenses while maximizing the use of available resources
- **Risk Mitigation:** Identify potential issues as early as in the planning phase, help reduces the likelihood of costly changes during construction, while enhancing overall project reliability.

### Why Choose OPUS

- Our team consists of certified professionals with extensive experience providing innovative solutions tailored to your specific needs
- We deliver integrated approach ensures that every aspect of our project is handled with care and precision, resulting in seamless execution from concept to completion.
- Our dedication to quality is unwavering, ensure that all projects meet stringent safety standards and delivered on time and within budget
- We believes in fostering strong partnerships with all stakeholders, leading to better decision-making and successful outcomes
